Art Unit: 2173

1. The following is a statement of the Examiner's reasons for allowance:
 - a. The Examiner agrees with the applicant's 4 December 2004 response, in that the prior art of record does not teach or suggest the presently-claimed document aggregation, in which indications of navigation stops are modified in view of their being detected within the larger framework of the aggregation.
 - b. Upon a final search of the prior art, the Examiner noted that both Cote et al. (US #6,785,865 B1) and Kamada (US #6,622,306 B1) relate to controlling the positions on an interactive screen into which navigation commands will cause the focus to jump, only these do not implement such control within the context of finding a stop in the assembly of an aggregated document and modifying the elements accordingly.
2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raymond J. Bayerl whose telephone number is (703) 305-9789. The examiner can normally be reached on M - F from 10:00 AM to 5:00 PM.
3. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Cabeca, can be reached on (703) 308-3116. All patent application related correspondence transmitted by FAX **must be directed** to the central FAX number (703) 872-9306.
4. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
